

MLP Care Environmental Policy

As MLP Care, we aim to protect the environment and contribute to the sustainability of natural resources, by complying with the legislation and regulations with the awareness of environmental responsibility, based on continuous development, in all the locations where we serve.

We committed to

- Complying with legislation, national and international quality standards in all environmental practices,
- Contributing the improving and protective activities according to the characteristics of the natural environment at the locations where we serve,
- Achieving continuous improvement in our processes with a risk-based perspective by establishing an effective risk management system in environmental management activities,
- Organizing consciousness and awareness trainings for all of our employees and guests with environmental responsibility.
- Minimizing, if possible, completely eliminate the negative effects on the environment that may arise from our activities,
- Making use of digital tracking systems in our environmental management studies,
- Identifying the waste types that may arise in all processes within the scope of the health services we provide, taking the necessary preventive measures at the source, to ensure recycling and/or disposal.
